All-Terrain Emergency Vehicle

Mobile Command

The coordination of multiple response vehicles and individuals on foot is vital in any tough environment. This command vehicle is specially designed for use in the coordination of emergency response, search and rescue, intelligence gathering and defense in more extreme rural or urban locations with rough terrain.

This all-terrain vehicle carries a suite of wireless technologies on board, making it a mobile command post with the answer, when you need them. It's ideal for responding to HAZMAT, terrorism, Mass Casualty, chemical and biological attacks, and emergency medical operations. During any crisis or defense situation, it also gathers intelligence, sends weather, provides surveillance, links and maintains communications, and answers the needs of a tactical search vehicle.

BASE VEHICLE:

Eight-wheeled All Terrain with Amphibious Capabilities.
Kohler 68.5 (25 hp) V-Twin 4-cylinder liquid cooled with Electronic Ignition.
Heavy load capacity (1,100 lbs.)
Transports 6 passengers and gear.
Trailer hitch: Towing capacity 1800 lbs.
An outdoor dimmer can be installed for higher-speed water travel.
All terrain amphibious trailers available.
Tight turn radius.

Climbs steep grades (45 degrees), including stairs and rubble.
Tracks protect wheels over glass and jagged metal (harpooning objects).
"FloaT" through extreme mud & snow where inaccessible by foot and other vehicles.

CUSTOM STEEL ROLL PROTECTION CAGE WITH BRUSH GUARD:
